

# Secure Communication Across Your Entire Organization

## Self-Hosted & Fully-Customizable

### Security

Wickr Enterprise is a user-friendly collaboration platform built with security at the forefront. Whether you are messaging, on a call, holding video conferences, file sharing, or using any of our other features, your communications are completely protected by our advanced security protocols. And since Wickr Enterprise is self-hosted, you have an extra layer of security to protect your organization.

### Compliance

While most working-level communications should never be stored for security purposes, some information must be maintained for auditing purposes. Wickr Enterprise allows organizations to selectively log communication sessions to a secure customer-defined data store when required.

### Control

With extensive administrative controls, you can control what data is kept, control permissions, and be alerted if someone is out of network. Additionally, you can temporarily or permanently allow individuals outside of your self-hosted network to communicate within your network, controlling their permissions as well.

*"Given the multitude of attacks and access to communications solutions, enterprises need to deploy, manage and have flexible administrative controls to not only secure sensitive communications, but follow best practices for retaining information as required. Wickr is the only product that offers this through strong encryption, deployment options and selective controls."*

**Joe Sullivan**

Former CSO of Facebook, Uber, and Cloudflare

## Features & Capabilities

### 1:1 and Group Messaging

Create secure rooms with up to 500 members

### Audio and Video Calling

Conference with up to 70 people

### Screen Sharing and Broadcasting

Present with up to 500 participants

### File Sharing and Saving

Transfer files up to 5 GBs with unlimited storage

### Administrative Controls

Tailor your setup for your organization

### Configurable Ephemerality

Control expiration and burn-on-read timers

### Advanced Layered Security

Nobody, including Wickr, can access your data

### Global Federation

Connect with Wickr users outside of your network

## Wickr Stands Up Against the Competition

	End-to-end Encryption								
	Text Chat	Voice Calls	Video Calls	File Sharing	Screen Sharing	MFA	Invitation Controls	Secure Deletion	Public Source Code
